

Installing Mini SAP Release 4.6D

Requirements:

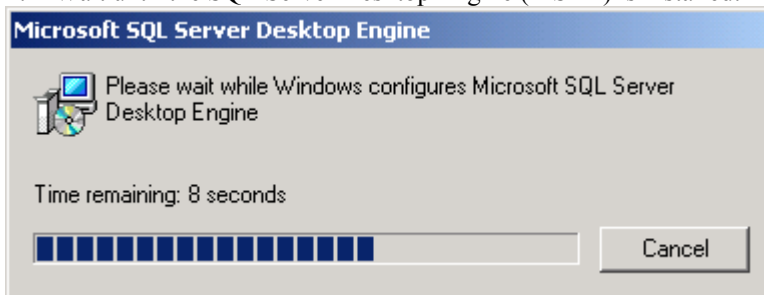

- Mini SAP Basis CDs:
 - **CD1** 50 043 446 Release 4.6D
Kernel + Documentation
Test Suite
 - **CD2** 50 043 446 Release 4.6D
Data
Test Suite
- Windows NT 4.0 w/SP4 or higher or Windows 2000
- RAM: 128MB minimum (real world: 256MB minimum)
- Disk space: 2.2GB minimum

1. Run setup.bat from the Kernel CD:

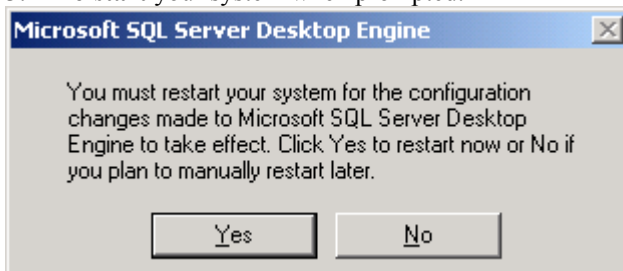

```
C:\WINNT\System32\cmd.exe
r3setup\activeds.dll
r3setup\adsldpc.dll
r3setup\CSARD.EXE
r3setup\dbmssslib.dll
r3setup\INSTGUI.EXE
r3setup\INSTGUI0.DLL
r3setup\INSTGUI1.DLL
r3setup\MBS.R3S
r3setup\msvc60.dll
r3setup\R3SETUP.EXE
r3setup\SAPCAR.EXE
11 file(s) copied.
```

2. Wait until the SQL Server Desktop Engine (MSDE) is installed:

3. Re-start your system when prompted.

4. Run **setup.bat** again from the Kernel CD:
5. Enter the **location** where the **Mini SAP software** should be installed:

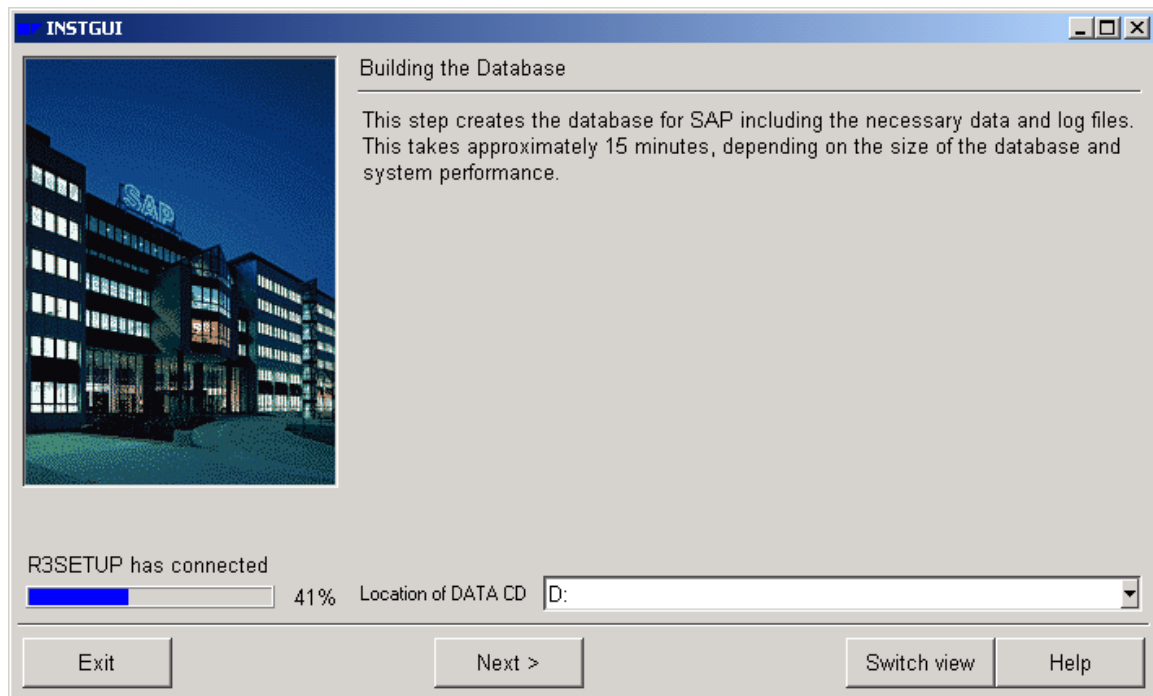

The screenshot shows the 'INSTGUI' window titled 'Requesting Installation Details'. On the left is a graphic of a building with 'SAP' on top. The main text area says: 'R3Setup needs general information about the configuration of the SAP System you want to install. Enter the required data.' Below this, it says 'R3SETUP has connected' followed by a progress bar at 0%. To the right of the progress bar is the label 'Specify the target directory for the Mini SAP Basis System' and a text box containing 'C:\MBS'. At the bottom are four buttons: 'Exit', 'Next >', 'Switch view', and 'Help'.

CD Name	Location
KERNEL	D:
DATA	D:

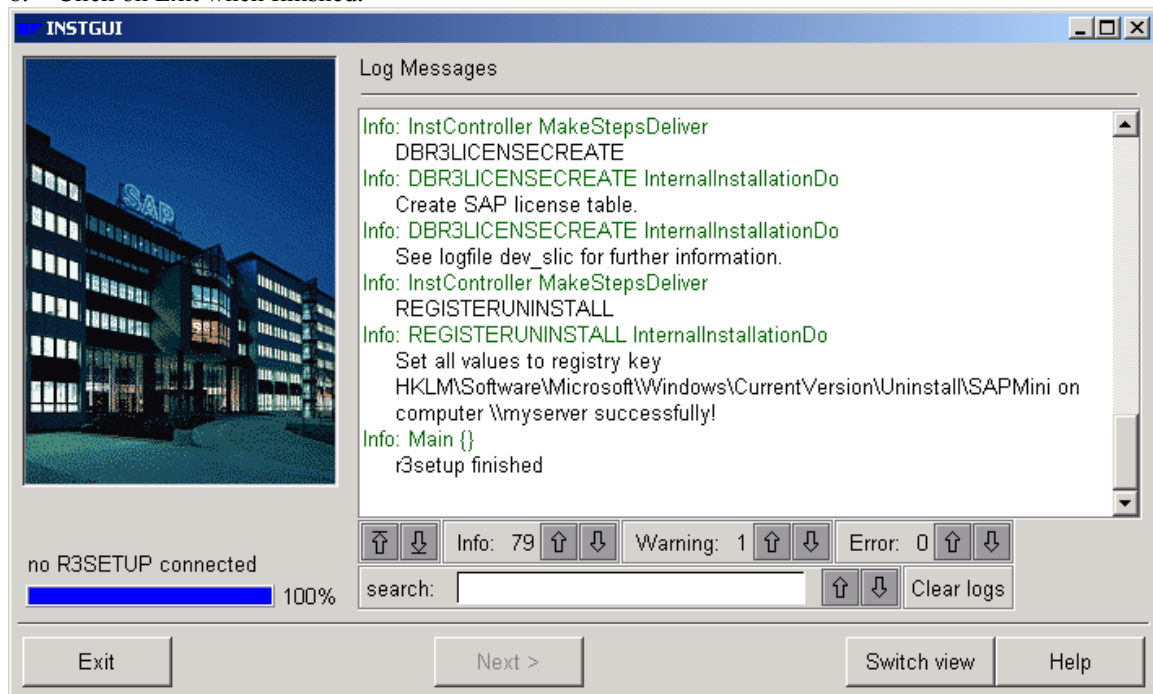

6. Enter the **location** where the **Kernel** and **Data** CDs are located:

The screenshot shows the 'INSTGUI' window titled 'Requesting Information on CD-ROMs'. On the left is the same building graphic. The main text area says: 'Installation tool needs information about the installation CDs. On the following screens you have to enter the location of some of the CDs and specify whether any of them have to be copied to your local disk.' Below this is a section titled 'Location of CDs' containing a table with two columns: 'CD Name' and 'Location'. The table has two rows: 'KERNEL' with 'D:' in the location field, and 'DATA' with 'D:' in the location field. At the bottom are four buttons: 'Exit', 'Next >', 'Switch view', and 'Help'.

7. Switch CDs if prompted for the **Data CD**

8. Click on Exit when finished.

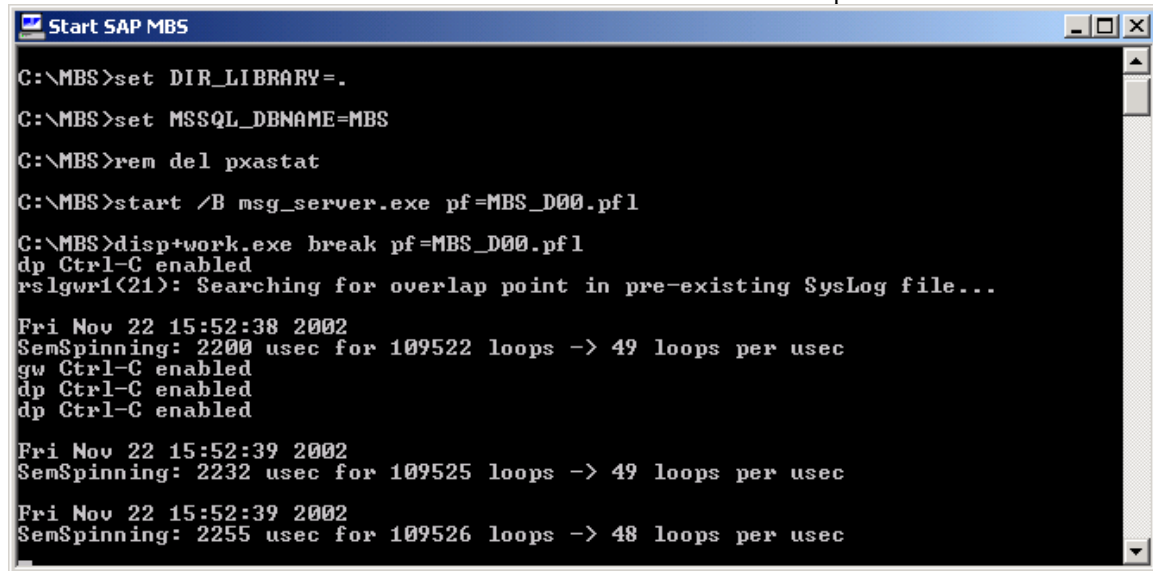

Installing SAPGUI

To install SAPGUI run SETUP.exe from the \MINIGUI directory on the Kernel CD.

Starting Mini SAP (MBS)

To start Mini SAP double-click on the “Start SAP MBS” icon on the desktop:

```
C:\MBS>set DIR_LIBRARY=.
C:\MBS>set MSSQL_DBNAME=MBS
C:\MBS>rem del pxastat
C:\MBS>start /B msg_server.exe pf=MBS_D00.pfl
C:\MBS>disp+work.exe break pf=MBS_D00.pfl
dp Ctrl-C enabled
rslgwr1(21): Searching for overlap point in pre-existing SysLog file...
Fri Nov 22 15:52:38 2002
SemSpinning: 2200 usec for 109522 loops -> 49 loops per usec
gw Ctrl-C enabled
dp Ctrl-C enabled
dp Ctrl-C enabled
Fri Nov 22 15:52:39 2002
SemSpinning: 2232 usec for 109525 loops -> 49 loops per usec
Fri Nov 22 15:52:39 2002
SemSpinning: 2255 usec for 109526 loops -> 48 loops per usec
```

Extending your Mini SAP license

To extend the license of a Mini SAP system visit <http://www.mysap.com/Technology/minisap>

Documents to read

Check all the .HTM files on the Kernel CD as they contain documentation on the installation of Mini SAP.
